Fluid Power Society
1397 Kenilwood Ct.
Riverwoodsm IL 60015

" Please join us at the Cubby Bear in Lincolnshire for a live demo of Bobcat's new All Wheel Steer Compact Loader.

All-Wheel Steer Mode

The new Bobcat all-wheel steer loader is a revolutionary compact loader with four steerable axles. That means less tire wear, less ground disturbance and less operator fatigue.

Skid-Steer Mode

Flip a switch, and the loader gives you all the advantages of a compact skid-steer loader. It can maneuver in tight spaces, turn within its own length and deliver high performance day in and day out.

One of our members and his local employer has been a key supplier and partner with Bobcat. They have supplied Hydraulic components to this new product its innovative new steering system.

Directions: Exit West from I-94; at Deerfield Rd, Right on Milwaukee, Cubby Bear North on Right hand side.

Exit East from IL 53; at Lake-Cook Road, North on Milwaukee, Pass Deerfield, Cubby Bear North on Right hand side.

Chapter Chatter:

Is anyone looking for PDH hours to fulfill requirements for a license or certification? Should the chapter offer technical training courses to fulfill these requirements?

Comments to Fred Biederman
