

IFPS TECHNICAL WORKSHOP

# Compressed Air Management Master Class

WHAT ARE YOUR BLIND SPOTS?

**March 11, 2024**

8:00 AM - 4:30 PM

being held in  
conjunction with the  
Annual meeting in San  
Antonio TX

- Understanding the entire system and reframing a compressed air system from a business perspective as a whole offers significant advantages.
- Learn some of the cutting edge techniques for reducing demand that can be applied across industries, implemented in a lab setting.
- Expand your understanding of compressor control techniques to improve performance, reliability, and cost-effectiveness, without needing to invest in new equipment.
- Start your company's journey toward long-term sustainability, by establishing a foundation built on a bedrock of system (not compressor) performance monitoring.

**OUR ESTEEMED LINEUP OF SPEAKERS INCLUDES INDUSTRY EXPERTS WHO WILL SHARE THEIR INSIGHTS AND EXPERTISE:**

**Jon Jensen - SMC Corporation of America**

Menno Verbeek - VPI Instruments

Josh Wamser - Industrial Compressor Solutions

Paul Edwards - Compressed Air Consultants
